

**NEU 492 – Section 3**  
**Current Approaches in Cellular and Molecular Neuroscience**  
**Spring 2022**

Lectures: Mondays and Wednesdays 12:40 – 2:00 PM

Farrall Ag Eng Hall 118

*Jan. 10 – 28; Synchronous*

Zoom: <https://msu.zoom.us/j/95370376962>

### **Course Instructor**

Michelle Mazei-Robison, [mazeirob@msu.edu](mailto:mazeirob@msu.edu), 4-5004, ISTB 5017

### **Office Hours**

Mondays 2:00 – 4:00 PM, Room 3162 Biomedical and Physical Science Building (BPS)

Please email Dr. Mazei-Robison to schedule appointments (in-person or Zoom) outside of office hours.

Zoom: <https://msu.zoom.us/j/93108442865>

Passcode: HELP

### **Course Description**

This is a one-semester course for advanced undergraduate Neuroscience majors. The main focus of this course is to provide an understanding of the current techniques used in molecular and cellular neuroscience and their application. The information will be presented in two ways: 1) lectures on the techniques delivered by the instructor, and 2) presentation and discussion of primary literature applying the technique that will be led by students. Students will be expected to participate vocally and consistently in paper presentations and discussions and the final grade will be dependent on this participation as well as assessment of learning through weekly quizzes.

**Prerequisites:** NEU 301

### **Course Learning Objectives**

At the completion of this course, students will:

- Have a basic understanding of the processes used in the techniques covered
- Be able to describe why the technique is used and give an example of a question it can answer
- Be able to list the pros and cons of the technique
- Be able to succinctly convey scientific results (including determining the assay used, identifying controls, summarizing what the data show)
- Be able to present scientific information clearly and concisely (oral and written)

## Course Requirements

### Reading

There will be a weekly assigned journal article that will be required reading and will be the subject of in-depth class discussion. There may be additional handouts or reading assignments to accompany the lecture material. There is no textbook for this course.

### Lectures

Lectures will occur on Wednesdays and the lecture topic is listed in the class schedule section below. Lectures will be held in-person and students are encouraged to attend to facilitate discussion and ask questions. Lecture recordings will be posted to D2L. Synchronous lectures will be recorded (slide presentation and audio feed). If you would like to ask a question during a zoom lecture, but are uncomfortable with your voice being recorded, please ask your question in the chat. I can then read the question to the class and answer it.

### Weekly Quizzes

There will be 12 quizzes throughout the semester, administered **in person** at the start of Wednesday sessions. Quizzes will occur every Wednesday and will cover the previous week's material. Quiz dates are listed in the Class Schedule section below. Due to online course requirements, Quiz 1 will be online (Wed. 1/26, as listed in the Class Schedule). Quiz 1 will be open from 9:00 – 5:00 on Wednesday and you will have 15 minutes from when you begin the quiz to finish it. This is equivalent to the time normally dedicated to the in-class quiz. I'm trusting you all to work independently and not consult your notes during the quiz.

- Quizzes cover the material presented in lecture and/or paper discussion from the previous week.
- Quizzes will contain a maximum of 10 questions. Various types of questions (e.g., multiple-choice, short-answer, and fill-ins) will be included.
- Students are allowed to drop their lowest quiz score (top 11 of 12 count toward final grade).

### Exams

There will be no exams or final exam for the course. However, there will be a class session during the scheduled final exam time (Mon. May 2<sup>nd</sup> 12:45 – 2:45) which will be the last paper discussion (see course schedule for details).

### Paper Discussions

Each Monday there will be a discussion of a journal article pertaining to the technique covered in the previous Wednesday lecture. Individual students will be assigned particular parts of the paper for presentation to the class (i.e., a figure(s)). Presentation grades will be determined based on the clarity and depth of presentation (grading rubric can be found in D2L) and each student will present twice during the semester. All students will be expected to participate vocally in discussion of each section presented. To facilitate discussion, attendance will be taken. Students are required to attend 10 of 13 sessions for full credit. Attendance during online paper discussions (i.e., Mon. 1/24) will be recorded using the chat function.

### Figure Facts Submission

To facilitate discussion of journal club articles, every student will complete a Figure Fact document each week. Completed Figure Facts must be submitted to D2L prior to Monday class (must be submitted by 12:30 PM on Mon.). Individual incorrect answers will not be penalized, but a lackluster attempt to

complete the document (blanks, non-relevant information, etc.) will result in no credit. Students are allowed to drop their lowest Figure Fact score (top 12/13 count toward final grade).

## Grading

### Grading Criteria

Grades will be based on weekly quizzes (55%), class presentations (27%), figure facts (12%) and class participation (7%).

Activity	Points
Quizzes (top 11/12, 10 points each) (55%)	110
Paper presentation (2 presentations x 26 points each) (26%)	52
Figure Facts (top 12/13, 2 points each) (12%)	24
Paper Discussion Attendance (top 10/13, 1.4 point each) (7%)	14
Total	200

Grading Scale	Percentage Points	Points
4.0	≥ 90%	≥ 180 points
3.5	85 – 89%	170-179 points
3.0	80 – 84%	160-169 points
2.5	75 – 79%	150-159 points
2.0	70 – 74%	140-149 points
1.5	65 – 69%	130-139 points
1.0	60 – 64%	120-129 points
0.0	≤ 59%	≤ 119 points

## Other Course Information

### Attendance and Absence Policies

Regular attendance (in-person) is critical for success in this course. There will be weekly in-class quizzes on Wednesdays and paper participation on Mondays. Paper discussions on Mondays will be led by students. It is important that students attend the discussion and interact with colleagues, thus attendance will be recorded on Mondays and attendance at 10 of 13 sessions is necessary for full credit. This means that students are allowed to miss 3 paper discussions for any reason (sick, appointment, transportation trouble, interview, etc.). Additional absences will not be excused, so there is no need to contact the instructor for a missed paper discussion.

There will be weekly in-class quizzes on Wednesdays and figure fact submissions (on D2L) on Mondays. Students are allowed to drop their lowest quiz and figure fact score. If you are going to miss a quiz or presentation, you must contact the instructor **before the activity** takes place, and you must produce a written excuse from your doctor or the Dean's office. If you miss an activity and you do not contact the instructor before the activity, you will receive a zero (0) for that activity.

### Covid-19 – Learning and Course Continuity Plans

Should a student be unable to attend or participate in class for an extended period of time due to Covid-19 it critical that they contact the instructor as soon as possible ([mazeirob@msu.edu](mailto:mazeirob@msu.edu)). Together, the student and instructor can work on an extended timeline for completion of 1) figure facts, 2) quizzes, and 3) paper presentations. Students may be asked to complete their paper presentation using an

alternative format (i.e., submission of a taped recording) if they cannot present during their scheduled slot and are unable to swap slots with a fellow student. The total attendance points will be reduced to accommodate absences due to Covid-19 (i.e., if student missed 2 discussions, total attendance points (14) would be reduced by 2.8 (1.4 point/discussion x 2 = 2.8) so new total attendance points possible would be  $14 - 2.8 = 11.2$  points).

In the unlikely event that the instructor is unable to instruct the course for an extended period of time students will be notified by email and D2L announcement. The class will shift to an online asynchronous model where lecture recordings will be posted to D2L on Wednesday mornings and students will submit recordings of their paper presentation to D2L on Mondays. Dr. Mazei-Robison would continue to grade all assessments, but the posting of scores may be delayed. If necessary, a substitute instructor will be assigned and contact information will be communicated to students.

## Class Schedule

The lecture topic is tentative and subject to change. Any changes to the schedule will be announced ahead of time and posted to D2L.

Red font indicates sessions that will be conducted synchronously via Zoom. \*Quiz 1 will be administered via D2L.

Week		Date	Assessment	Topic
1	Mon.	10-Jan	n/a	Introduction to class and syllabus
	Wed.	12-Jan	n/a	How to read a scientific paper
2	Mon.	17-Jan	n/a	No class - MLK day
	Wed.	19-Jan	n/a	RT-PCR and western blot
3	Mon.	24-Jan	Figure facts 1	Paper: RT-PCR and western blot
	Wed.	26-Jan	Quiz 1*	RNA sequencing
4	Mon.	31-Jan	Figure facts 2	Paper: RNA sequencing
	Wed.	2-Feb	Quiz 2	Transgenic mice
5	Mon.	7-Feb	Figure facts 3	Paper: Transgenic mice
	Wed.	9-Feb	Quiz 3	CRISPR/Cas9 gene editing
6	Mon.	14-Feb	Figure facts 4	Paper: CRISPR gene editing
	Wed.	16-Feb	Quiz 4	Microscopy
7	Mon.	21-Feb	Figure facts 5	Paper: Microscopy
	Wed.	23-Feb	Quiz 5	Neurotracers
8	Mon.	28-Feb	Figure facts 6	Paper: Neurotracers
	Wed.	2-Mar	Quiz 6	Viral vectors
9	Mon.	7-Mar	n/a	No class – spring break
	Wed.	9-Mar	n/a	No class – spring break
10	Mon.	14-Mar	Figure facts 7	Paper: Viral vectors
	Wed.	16-Mar	Quiz 7	Electrophysiology
11	Mon.	21-Mar	Figure facts 8	Paper: Electrophysiology
	Wed.	23-Mar	Quiz 8	Voltammetry
12	Mon.	28-Mar	Figure facts 9	Paper: Voltammetry

	Wed.	30-Mar	Quiz 9	Optogenetics
13	Mon.	4-Apr	<i>n/a</i>	<b>No class - break day</b>
	Wed.	6-Apr	<i>n/a</i>	<b>No class - break day</b>
14	Mon.	11-Apr	Figure facts 10	Paper: Optogenetics
	Wed.	13-Apr	Quiz 10	DREADDs
15	Mon.	18-Apr	Figure facts 11	Paper: DREADDs
	Wed.	20-Apr	Quiz 11	Calcium imaging
16	Mon.	25-Apr	Figure facts 12	Paper: Calcium imaging
	Wed.	27-Apr	Quiz 12	Neuronal cultures - iPSC
exam week	Mon.	2-May	Figure facts 13	Paper: iPSCs, <b>**class 12:45 - 2:45</b>

## Honors Option

No Honors option is available for this course.

## MSU Course Policies

### Academic Integrity

The “Academic Freedom for Students at Michigan State University” document (found at <http://splife.studentlife.msu.edu>) is a legal document that you, as a member of the MSU community, should be familiar with. The welcome letter at the beginning reads, in part:

*“As an academic community, it is necessary to set standards that will promote an environment conducive to learning. The first part of Spartan Life presents the policies, regulations and guidelines developed to provide an atmosphere that furthers opportunities for intellectual and personal development while protecting individual freedoms. As a student you are encouraged to exercise your rights and you are expected to meet your responsibility to adhere to the standards set. The second part of this guide serves to inform you of the rules, regulations, rights and responsibilities that have been established in the interest of all members of the University community.”*

In addition, we will adhere to the policies on academic honesty as specified in General Student Regulations, *Protection of Scholarship and Grades* (found at <http://splife.studentlife.msu.edu/regulations/general-student-regulations>), the all-University Policy on *Integrity of Scholarship and Grades* (found at <http://splife.studentlife.msu.edu/regulations/selected/integrity-of-scholarship-and-grades>). Behavior that is disrespectful to the instructor or fellow students during class will not be tolerated. This includes exchanging electronic or other notes, web-surfing, talking amongst each other, playing with any electronic gadget, etc.

### Inform Your Instructor of Any Accommodations Needed

From the Resource Center for Persons with Disabilities (RCPD): Michigan State University is committed to providing equal opportunity for participation in all programs, services and activities. Requests for accommodations by persons with disabilities may be made by contacting the Resource Center for Persons with Disabilities at 517-884-RCPD or on the web at [rcpd.msu.edu](http://rcpd.msu.edu). Once your eligibility for an accommodation has been determined, you will be issued a Verified Individual Services Accommodation ("VISA") form.

Please present this form to **prior to the accommodation date (e.g., Quiz 1 is Wednesday January 26<sup>th</sup>, so forms must be submitted by Monday January 24<sup>th</sup>)**. Requests received after this date may not be honored.

### **Limits to Confidentiality**

Students should be aware that University employees, including instructors, may not be able to maintain confidentiality when it conflicts with their responsibility to report certain issues to protect the health and safety of MSU community members and others. As the instructor, I must report the following information to other University offices (including the Department of Police and Public Safety) if you share it with me:

- Suspected child abuse/neglect, even if this maltreatment happened when you were a child,
- Allegations of sexual assault or sexual harassment when they involve MSU students, faculty, or staff, and
- Credible threats of harm to oneself or to others.

These reports may trigger contact from a campus official who will want to talk with you about the incident that you have shared. In almost all cases, it will be your decision whether you wish to speak with that individual. If you would like to talk about these events in a more confidential setting you are encouraged to make an appointment with the MSU Counseling Center.

### **Grief Absence Requests**

Course instructors are sensitive to and will accommodate the bereavement process of a student who has lost a family member or who is experiencing emotional distress from a similar tragedy so that the student is not academically disadvantaged in his/her classes. It is the responsibility of the student to: a) notify the Associate Dean of his/her college of the need for a grief absence prior to leaving campus, b) provide appropriate verification of the grief absence as specified by the Associate Dean, and c) complete all missed work as determined by the instructor. It is the responsibility of the Associate Dean or designee to a) determine with the student the expected period of absence – it is expected that some bereavement processes may be more extensive than others depending on individual circumstances, b) notify the faculty that the student will be absent, and c) receive verification of the authenticity of a grief absence request upon the student's return. It is the responsibility of the instructor to work with the student to: a) make reasonable accommodations and b) to include appropriate language describing such accommodations in their course syllabus, so that the student is not penalized due to a verified grief absence.

Students who believe their rights under this policy have been violated should contact the University Ombudsperson.

For the Grief Absence Request form go to:

<https://reg.msu.edu/StuForms/Stuinfo/GriefAbsenceForm.aspx>.

<http://splife.studentlife.msu.edu/regulations/selected/grief-absence-policy>
